

1 CHART SUBMISSION GUIDELINES

Your chart must follow these rules:

- Use dark background
- Clearly mark **key levels**: Entry, Target, Support/Resistance zones
- Add **maximum 2 indicators** only (e.g., RSI, EMA, VWAP — any two)
- Use **long/short position tool** to show Entry, SL, and TP visually

2 ANALYSIS FORMAT – Add These 3 Simple Points (MANDATORY)

1 – Why this token? (Market/Token Structure Insight)

Why this token was chosen — relative strength, trend, news, sector move, etc.

Example: Token stayed strong despite market drop. Recent ecosystem news and funding spike made it attractive.

2 – Entry Reason (Technical Trigger)

What triggered the trade idea — breakout, retest, bounce, etc.

Example: Entered after price reclaimed key \$X support with strong volume and close above 200 EMA on 1H.

3 – What to Monitor After Entry (User Tip)

Give a short, helpful tip to customers on what to watch next

Example: Watch how price reacts at \$Y resistance. If rejected with high volume, consider partial booking.
